### **1 PROJECT INTRODUCTION**

'Appraisal of the National Road Safety Action Plan: Current status, Institutional readiness and Way Forward' was carried out as one of the activities under the 5th UN Global Road Safety Week.

The study reviewed the current road safety national action plan and proposed revision considering the stakeholder readiness other constraint to ensure that the activities identified in the action plan are implemented more efficiently. The study was conducted through the Transportation Engineering Division, Department of Civil Engineering, University of Moratuwa

The study team comprised of the following members,

- 1. Prof. Saman Bandara , Department of Civil Engineering, University of Moratuwa
- 2. Dr. H.R.Pasindu, Department of Civil Engineering, University of Moratuwa
- 3. Dr. Loshaka Perera, Department of Civil Engineering, University of Moratuwa
- 4. Dr. Ishani Dias, Department of Civil Engineering, Kothalawala Defense University
- 5. Prof. Wasantha Mampearachchi, Department of Civil Engineering, University of Moratuwa

#### 1.1 BACKGROUND OF THE STUDY

The National Road Safety Action Plan was developed through a consultative process as well as by individual consultation in 2011 as part of the United Nations the Decade of Action for Road Safety initiative. In 2016 the action plan was updated through stakeholder workshops conducted with the technical assistance of WHO. A number of parameters were included in the 2016 update. They are:

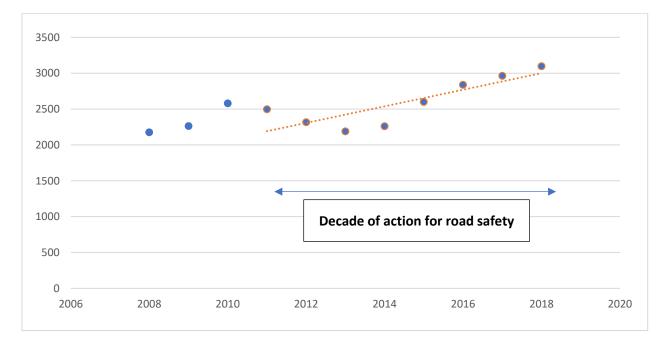

- 1. Identification of the Lead Agency
- 2. Identification of Partner agencies if any
- 3. Expected outcome
- 4. Effectiveness of the intervention
- 5. Expected Cost Level
- 6. Key performance Indicator(s)

The present action plan was formulated in 2011 and was revised again in 2016. However, it was observed that there was no coordinated implementation of the strategies identified even though different organizations implemented some of the activities identified in the strategic plan through various other projects.

The main issues identified with respect to the present the implementation of the action plan,

- 1. A coordinating organization was not appointed during the implementation of the action plan
- 2. A representative or a lead officer was not appointed from the stakeholder organizations to coordinate with other agencies.
- 3. Monitoring and evaluation program for the identified strategies and activities was not carried out the by the implementing agency
- 4. It appears that a separate budget allocation was not provided specifically for the activities identified in the action plan, although some of the activities have been implemented through other projects
- 5. Changes to the ministries and their portfolios disrupts the continuity in carrying out a long-term plan as well as low priority given for road safety interventions hinders allocation necessary resources for project implementation.

An overview of the accident data over the same period also suggest that the overall effectiveness of the road safety interventions during this period has been low. As shown in Figure 1, the fatal accidents in the period 20011-2018 show an increasing trend, comparable to the period before that. Similar observations can be made through inferences made on pedestrian casualties, motor cycle accident etc.

### Figure 1. Fatal accidents from 2007-2018

### 1.2 STUDY OBJECTIVE

Evaluate the current National Road Safety Action Plan Sri Lanka with regards to progress made so far, readiness of the stakeholder institutes to contribute to conduct the activities as a preliminary step to extend the <u>National Road Safety Action Plan of Sri Lanka</u> to 2030 to be in line with the SDG 2030 goals and targets related to road safety<sup>1</sup>.

1

#### SDG Goal 3: Ensure healthy lives and promote well-being for all at all ages

Target 3.6: By 2020, halve the number of global deaths and injuries from road traffic accidents

#### SDG Goal 11: Make cities and human settlements inclusive, safe, resilient and sustainable

Target 11.2: By 2030, provide access to safe, affordable, accessible and sustainable transport systems for all, improving road safety, notably by expanding public transport, with special attention to the needs of those in vulnerable situations, women, children, persons with disabilities and older persons

### 2 ROAD SAFETY ACTION PLAN DEVELOPMENT

#### 2.1 INTRODUCTION

Development of the Road Safety Action Plan for Sri Lanka follows on the same frame work of the 2011 action plan which are developed based on the five-pillar concept proposed by the United Nations Road Safety Collaboration for a Global Plan for the Decade of Action for Road Safety to provide an overall framework for action.

- Pillar 1: Build Road Safety Management Capacity
- Pillar 2: Influence Safe Road Design and Network Management
- Pillar 3: Influence Vehicle Safety Design
- Pillar 4: Influence Road User Behavior
- Pillar 5: Improving Post Crash Care

| Pillar 1   | Pillar 2     | Pillar 3 | Pillar 4   | Pillar 5   |
|------------|--------------|----------|------------|------------|
| Road safey | Safer roads  | Safer    | Safer road | Post-crash |
| management | and mobility | vehicles | users      | response   |

#### Figure 2. Pillars of the Global Plan for the Decade of Action for Road Safety 2011–2020<sup>2</sup>

The specific objectives of the decade of action were,

- 1. Adhering to and fully implementing the major United Nations road safety related agreements
- 2. Developing and implementing sustainable road safety strategies and programs
- 3. Setting an ambitious yet feasible target for reduction of road fatalities by 2020 by building on the existing frameworks of regional casualty targets;
- 4. Strengthening the management infrastructure and capacity for technical implementation of road safety activities
- 5. Improving the quality of data collection

<sup>&</sup>lt;sup>2</sup> Global Plan for the Decade of Action for Road Safety, 2011–2020. Geneva, World Health Organization, 2011.

- 6. Monitoring progress and performance on a number of predefined indicators
- 7. Encouraging increased funding to road safety and better use of existing resources, including through ensuring a road safety component within road infrastructure projects
- 8. Building capacities at national, regional and international level to address road safety.

The proposed action plan also aims to achieve these specific objectives which are outlined through its strategies and the activities. The action plan is developed for each of the pillars by identifying strategies and major activities under each strategy. The main output from these activities is also identified and the outcome expected from implementation of the activity is also indicated. The output is used to monitor progress of the activity implementation whereas the outcome would be used to evaluate the overall impact from the activity or the strategy in general.

### 2.2 STAKEHOLDER ORGANIZATIONS

The following stakeholder organizations, institutions were identified as those who are relevant for the Road Safety Action Plan development and implementation.

- 1. Department of Motor Traffic (DMT)
- 2. Insurance Board Sri Lanka
- 3. Insurance Association Sri Lanka
- 4. Local Government Authorities (LA)
- 5. Ministry of Education (MOE)
- 6. Ministry of Finance (MOF)
- 7. Ministry of Health (MOH)
- 8. Ministry of Justice
- 9. Ministry of Highways & Road Development (MOH)
- 10. Ministry of Transport (MOT)
- 11. National Council for Road Safety (NCRS)
- 12. National Transport Commission (NTC)
- 13. Police Department
- 14. Provincial Road Development Authority (PRDA)
- 15. Road Development Authority (RDA)
- 16. Sri Lanka Land Reclamation and Development Corporation (SLRDCC)

- 17. Sri Lanka Railway (SLR)
- 18. University of Moratuwa (University)
- 19. Urban Development Authority (UDA)
- 20. World Health Organization (WHO)
- 21. Ministry of Provincial Councils & Local Government (MOLG)
- 22. Colombo Municipal Council (CMC)
- 23. National Transport Medical Institute (NTMI)
- 24. Ministry of Mass Media
- 25. College of Anesthesiologists (COA)
- 26. College of Rheumatologists (COR)
- 27. College of Surgeons (COS)
- 28. Department of Social Services (DSS)

NOTE: Since the names of the ministry may change during depending on the portfolios assigned, the ministry stated above refers to the ministry handling relevant subject.

### 2.3 WORKSHOPS AND DISCUSSIONS

Several discussions were held to obtain the inputs of stakeholder organizations.

Preliminary discussions were held at Department of Motor Traffic, National Council for Road Safety, Road Development Authority, University of Moratuwa and World Health Organization.

With the obtained inputs of stakeholder organizations, two workshops were held at National Council for Road Safety.

### 2.3.1 WORKSHOP 01

The first workshop was held on 18.10.2019 with the participation of following stakeholders.

| Name                    | Organization                                   |
|-------------------------|--|
| Dr. Sisira Kodagoda     | National Council for Road Safety               |
| Prof. Saman Bandara     | University of Moratuwa                         |
| Dr. Loshaka Perera      | University of Moratuwa                         |
| P.H.R.T Chandrasiri     | Sri Lanka Transport Board                      |
| Dr. Ishani Dias         | General Sir John Kotelawala Defense University |
| U.M. Premalal           | Automobile Association of Ceylon               |
| Dr. Dimantha de Silva   | University of Moratuwa                         |
| J.A.S. Jayaweera        | Department of Motor Traffic                    |
| Dr. Achala Jayatilake   | World Health Organization                      |
| W.H.M. Wickramasooriya  | Sri Lanka Police                               |
| Indika Hapugoda         | Sri Lanka Police                               |
| Devapriya Hettiarachchi | Automobile Association of Ceylon               |
| Subhashini Caldera      | World Health Organization                      |
| R.K.T.K. Ranawaka       | University of Moratuwa                         |
| R.M.K. Sandamal         | University of Moratuwa                         |

#### 2.3.2 WORKSHOP 02

The second workshop was held on 25.10.2019 at National Council of Road Safety with the participation of following stakeholders.

| Name                     | Organization                                   |
|--------------------------|--|
| J.M. Thilakarathna Banda | Ministry of Transport and Civil Aviation       |
| Dr. H.R. Pasindu         | University of Moratuwa                         |
| Dr. Ishani Dias          | General Sir John Kotelawala Defense University |
| A. Monsoor               | Ministry of Justice                            |
| Priyangi de Silve        | Insurance Regulation Commission                |
| Dr. Achala Jayatilake    | World Health Organization                      |
| K.R. Withanage           | DCS Engineer Ser. Office Sabaragamuwa Province |

| R.K.T.K. Ranawaka | University of Moratuwa |
|-------------------|------------------------|
| L.H.H. Perera     | University of Moratuwa |

In addition, a meeting with representatives from Ministry of Health, College of Surgeons and WHO was held on the 1<sup>st</sup> November 2019 at WHO office in Colombo to discuss the revisions necessary in the Pillar 5 which are focused on post-crash care.

Figure 3. Workshops held at NCRS

### **3 PROPOSED ACTION PLAN**

### 3.1 PILLAR 1: BUILD ROAD SAFETY MANAGEMENT CAPACITY

#### 3.1.1 STRATEGY 1: CONVERSION OF THE ESTABLISHED NATIONAL COUNCIL FOR ROAD SAFETY TO AN AUTHORITY TO ACT AS

#### THE LEAD AGENCY WITH IMPLEMENTATION POWERS

| Major Activities   | Lead Agency | Partner<br>Agency 1 | Partner<br>Agency 2    | Output  | Expected outcome   |
|--|-------------|---------------------|------------------------|---|--|
| Establishment of a commission by<br>amendments to the act with<br>inclusion of key ministries including<br>health.                                       | МОТ         | NCRS                | МОН                    | Establishment of National<br>Road Safety Commission<br>or similar institution | Increase coordination<br>and implementations of<br>road safety related<br>activities     |
| Strengthening of the NCRS with the<br>necessary infrastructure, HR and<br>training needs & developing a<br>national policy & strategy for road<br>safety | МОТ         | NCRS                |                        | Increase in number of<br>road safety activities<br>under each pillar          | Increase coordination of<br>road safety activities<br>among stakeholder<br>organizations |
| Advocating for a separate<br>consultative sub-committee for<br>Road Safety at national level and<br>road safety councils at provincial<br>level          | NCRS        | MOLG                | Provincial<br>Councils | Number of sub-<br>committees established                                      | Increase awareness on<br>road safety at provincial<br>level                              |

### 3.1.2 STRATEGY 2: ENSURE CONTINUOUS & ADEQUATE AVAILABILITY OF FUNDS FOR ROAD SAFETY

| Major Activities   | Lead Agency | Partner<br>Agency 1 | Partner<br>Agency 2    | Output  | Expected outcome   |
|--|-------------|---------------------|------------------------|---|--|
| Encourage stakeholder<br>organizations to increase or<br>provide specific allocation<br>designated for road safety in<br>the budget allocation | MOF         | МОТ                 | MOH<br>MO.<br>Highways | Increase in budget<br>allocation for road safety<br>related projects. | Effective implementation of<br>interventions identified<br>road safety action<br>plan/strategic plan |

# 3.1.3 STRATEGY 3: ESTABLISHMENT OF A ROAD SAFETY INFORMATION SYSTEM FOR COORDINATION & EVALUATION

| Major Activities   | Lead Agency | Partner<br>Agency 1 | Partner<br>Agency 2      | Output   | Expected outcome   |
|--|-------------|---------------------|--------------------------|--|--|
| Initiate a process of identifying,<br>collecting and reporting road<br>hazards to the relevant<br>authorities Stakeholders | MOH/LA      | MO.<br>Highways     | Provincial<br>Councils   | Identifying the hazardous<br>location in the road, record<br>of road safety issues<br>identified | Reduction in accident<br>prone locations due to<br>roadway issues                    |
| Initiate a process to collect all<br>accident with relevant<br>information   | NCRS        | Police              | University               | Maintaining a proper<br>accident recording system  | Improve the reliability and timely availability of data                              |
| Introduction of a Centralized<br>Link through networking and<br>the establishment of a central<br>and data base at NCRS    | NCRS        | Police              | University<br>/Insurance | Development of accident databased with access to selected stakeholders                           | Informed decision making<br>for safety intervention with<br>up to date reliable data |

| Major Activities  | Lead Agency | Partner<br>Agency 1 | Partner<br>Agency 2 | Output  | Expected outcome   |
|---|-------------|---------------------|---------------------|---|--|
| R & D in Road Safety<br>established and a mechanism<br>for out sourcing research<br>initiatives in the areas of<br>infrastructure, vehicle<br>technology, traffic<br>management and the post-<br>crash care to universities and<br>research agencies on<br>competitive funding basis. | NCRS        | University          | MOT<br>MO. Highways | Number of research grants<br>given and the budget<br>allocation.  | Dissemination of<br>knowledge on road safety<br>Increase awareness on<br>road safety issue based on<br>research findings<br>Recommendations for<br>safety related<br>interventions that are more<br>focused and effective. |
| Projects initiated for new designs, testing of equipment and road furniture with enhanced safety features.  | NCRS        | RDA/PRDA            | University          | Develop road furniture and<br>design practices, material<br>used in construction that<br>improve the safety<br>performance of roads | Reduce number and severity of accidents  |

## 3.1.4 STRATEGY 4: Establishment of road safety research development program

### 3.1.5 STRATEGY 5: CONTINUOUS TRAINING OF ROAD SAFETY PERSONNEL

| Major Activities   | Lead Agency | Partner<br>Agency 1 | Partner<br>Agency 2   | Output | Expected outcome                                     |
|--|-------------|---------------------|-----------------------|--------|--|
| Provide specialized short-term training to Police Officers and |             | University          | Police RDA<br>CMC DMT |        | Increase knowledge among stakeholders on road safety |

| other stakeholder organizations<br>who are engaged in road safety<br>management  |            |             | professionals in the stakeholder organizations   |   |
|--|------------|-------------|--|---|
| Ensure all stakeholder<br>organizations designate<br>adequate numbers of officers at<br>each level for dedicated road<br>safety work and provide<br>continuous funding for their<br>training | NCRS       | All         | An increased workforce for<br>implementation of safety<br>related activities                 | Improve implementation of<br>road safety action plan/<br>strategic plan                   |
| Strengthen and capacity of<br>Traffic police headquarters<br>officers as trainers  | Police     |             | Police officers with proper training   | Increase knowledge and<br>awareness about road<br>safety among traffic police<br>officers |
| Train highway engineers to<br>conduct safety audits and<br>conduct safety audits & black<br>spot identification on regular<br>basis in each District/Division                                | University | RDA/PRDA/LA | Proper training for<br>engineers to identify safety<br>issues related to roadway<br>features | Capacity building of<br>professionals involved in<br>mananging the road<br>network        |
| Making aware the role of the<br>responsibilities of Local<br>Authorities in road safety and<br>helping them to implement &<br>setting up of the capacity to<br>implement and assist the      | NCRS       | MOLG        | Relevant authorities with<br>proper knowledge on their<br>roles in road safety               | Ensure the safety of people<br>in the local road network                                  |

| Municipalities & Urban Councils |  |  |  |
|---------------------------------|--|--|--|
| island wide.                    |  |  |  |
|                                 |  |  |  |

### 3.1.6 STRATEGY 6: MONITORING AND EVALUATION PROCESS

| Major Activities  | Lead Agency | Partner<br>Agency 1 | Partner<br>Agency 2 | Output  | Expected outcome   |
|---|-------------|---------------------|---------------------|---|--|
| Monitor the action plan performance on a yearly basis   | NCRS        |                     |                     | Report on progress of<br>strategic plan activities on a<br>quarterly basis submitted<br>to all stakeholders | Improve the progress of strategy implementation                      |
| Measure the performance of<br>Sri Lanka against the global<br>indicators, milestones and<br>midterm & end of term<br>evaluation of the decade | NCRS        | University          |                     | Applying suitable<br>international practices for<br>evaluation of road safety<br>interventions              | Benchmark Road Safety<br>status of Sri Lanka with<br>other countries |

## 3.2 PILLAR 2: INFLUENCE SAFE ROAD DESIGN AND NETWORK MANAGEMENT

# 3.2.1 STRATEGY 1: Improve safety aspects of road design standards for new roads and effect improvements to existing roads

| Major Activity  | Lead<br>Agency | Partner<br>Agency 1 | Partner<br>Agency 2 | Output  | Expected Outcomes                            |
|---|----------------|---------------------|---------------------|---|--|
| Review existing road signs,<br>markings and speed limits  | MOT            | RDA                 | Police              | Roads with proper signage   | Regularize road signs and markings           |

| Improve passenger accessibility<br>and passenger safety in public<br>transport services   | SLR/NTC/<br>SLTB/PTAs | Public transport services<br>with the required<br>pedestrian safety standards                   | transport users and encourage  |

# 3.3 PILLAR 3: INFLUENCE VEHICLE SAFETY DESIGN

### 3.3.1 STRATEGY 1: IMPROVE THE STANDARDS FOR REGISTRATION

| Major Activities   | Lead<br>Agency | Partner<br>Agency 1 | Partner<br>Agency 2 | Output   | Expected outcome  |
|--|----------------|---------------------|---------------------|--|---|
| Introduce a new system of inspection of imported vehicles at the port prior to registration.                   | DMT            |                     |                     | Standardized<br>inspection system for<br>imported vehicles | Identification and ensuring safety standards of the vehicles  |
| Introduce approval for type certification by DMT.  | DMT            |                     |                     |  | Confirmation of safety<br>standards with the Motor<br>Traffic Act & regulation for local<br>manufactures and imported<br>vehicles |
| Strengthen DMT for inspecting,<br>supervising and control of<br>approved garage issue fitness<br>certificates. | DMT            |                     |                     | Appropriate system for usage at DMT                        | Ensure safety standard of in use vehicles   |
| Introduce standards and regulations for registration of all vehicles.  | DMT            |                     |                     | A standardized vehicle registration system                 | Harmonization with global safety standards  |

| Continuously monitor and<br>Introduce new safety standards &<br>implement them. | Police |                                     | Establishment of mechanism for implementation. |
|---|--------|-------------------------------------|--|
|   |        | No of safety standards implemented. |  |

# 3.3.2 STRATEGY 2: Establish effective inspection program for the inspection of roadworthiness of vehicle

| Major Activities  | Lead<br>Agency | Partner<br>Agency 1 | Partner<br>Agency 2 | Output   | Expected outcome                                     |
|---|----------------|---------------------|---------------------|--|--|
| TA to develop standards and<br>procedures for scrapping of<br>vehicles and re-registering of<br>temporary prohibited vehicles.<br>Condemned vehicles are not re-<br>registered.       | DMT            | МОТ                 |                     | A vehicle fleet consisting suitable vehicles   | Removal of un-roadworthy vehicles from vehicle feet. |
| Strengthen the island wide roadside inspection program.   | DMT            |                     |                     | Increase the number of inspections carried out | Ensure roadworthiness of vehicle fleet               |
| Preparation of specifications<br>for vehicle fitness certificates<br>and quality assurance<br>certificates and thereby<br>improve testing standards and<br>establishment of a system. | DMT            |                     |                     | Preparation of the specification               | Improve the vehicle inspection<br>system             |

| Preparation of specification<br>and procedures for the<br>registration of garages and<br>certification of mechanics.  | DMT |        | Establishment of<br>procedure &<br>mechanisms for<br>registering garages and<br>mechanics                             | Ensure roadworthiness of vehicle fleet  |
|---|-----|--------|---|---|
| Provide training for Police<br>Officers to inspect vehicles<br>involved in accidents other<br>than fatal accidents and other<br>accidents with damage to the<br>third party   | DMT | Police | Police officers with the knowledge of vehicle inspection  | Improve accident<br>investigation process and data<br>quality in the accident<br>database |
| A permitted life span should be<br>identified for all vehicles, after<br>which they should not be<br>permitted on roads or<br>formulate a mechanism to<br>introduce an additional fee/<br>roadworthiness testing for<br>vehicles exceeding permitted<br>life span except for those<br>classified as except vintage car. | DMT |        | Determination of the<br>maximum life span by<br>vehicle categories and<br>Establishment of the<br>relevant regulation | Ensure roadworthiness of vehicle fleet  |
| Unlawful modifications to<br>vehicles should not be<br>permitted and this should<br>include restrictions on   | DMT | Police | Enactment of the<br>necessary regulations<br>on unlawful<br>modifications   | Reduce the severity of injuries<br>to passengers as well risk of<br>accidents             |

| accessories harmful to road |  |  |  |
|-----------------------------|--|--|--|
| safety and the environment  |  |  |  |
|                             |  |  |  |
|                             |  |  |  |
|                             |  |  |  |

# 3.3.3 STRATEGY 3: Monitoring safety aspects bicycles, motor bicycles & three wheelers operations

| Major Activities   | Lead<br>Agency | Partner<br>Agency 1 | Partner<br>Agency 2 | Output  | Expected outcome              |
|--|----------------|---------------------|---------------------|---|-------------------------------|
| Encourage bicycles and motor-<br>cycle to use accessories<br>necessary for road safety such as<br>reflectors, lights | Police         | NCRS                |                     | Increased no. of motorcycles with necessary accessories                                       | Improve safety of the cyclist |
| Inspection program to identify<br>illegal modifications on three-<br>wheelers and motorcycles                        | RDA            | Police              |                     | Number of inspections<br>carried out and<br>percentage of vehicles<br>with such modifications | Improve passenger safety      |

# 3.3.4 STRATEGY 5: Monitoring import vehicles

| Major Activities   | Lead<br>Agency | Partner<br>Agency 1 | Partner<br>Agency 2 | Output   | Expected outcome |
|--|----------------|---------------------|---------------------|--|------------------|
| Importation of oversized vehicles<br>should be restricted and permission<br>should be given only for vehicles<br>that are approved by the relevant<br>authorities prior to importation | DMT            | RDA                 |                     | Number of such<br>incidents recorded and<br>the cases where<br>restrictions were<br>imposed. |                  |

# 3.4 PILLAR 4: INFLUENCE ROAD USER BEHAVIOR

# 3.4.1 STRATEGY 1: Improved system of issuing and monitoring licenses

| Major Activities  | Lead<br>Agency | Partner<br>Agency 1 | Partner<br>Agency 2 | Output   | Expected outcome                                      |
|---|----------------|---------------------|---------------------|--|---|
| Introduce a computerized system to<br>conduct the theory and driver<br>behavior (Hazard test, simulation)<br>test prior to granting trainee license                                 | DMT            | University          |                     | Development of the new<br>system<br>Number of license<br>applicants undergone the<br>test via computerized<br>system | Improve the knowledge of the drivers                  |
| Introduction of computer aided<br>driver testing and installation at DMT<br>and District Secretariats   | DMT            |                     |                     | Number of driver testing centers completed   | Improving the knowledge<br>and skill level of drivers |
| Fully implement de merit points<br>system   | DMT            |                     |                     | De merit point system implementation   | Improved driver behavior                              |
| A mandatory probation period of<br>three years to be made compulsory.<br>Issuing the permanent license or<br>extending probation period should<br>depend on his/her demerit points. | DMT            |                     |                     | Implementation of the probationary period regulation   | Improve the skill level of novice drivers             |

| Assessing the issuing process of<br>higher grade driving license and<br>eligibility criteria for drivers of public<br>transport vehicles | DMT |      | Identification<br>improvements<br>process          | of<br>to the | •   |
|--|-----|------|--|--------------|---|
| Amendments to the legislation to be<br>introduce a mechanism of collecting<br>the licenses of persons who had died.                      | DMT |      | Cancelling drivin<br>people who had                | •            | To minimize the possibility of misused driving licenses                     |
| Employer made responsible for driver's condition and validity of the license checked every year  | DMT | NTMI | Formulate the regulation                           | necessary    | Improving the safety<br>standards of professional<br>drivers                |
| Capacity improvement of examiners<br>and set minimum criteria to recruit<br>examiners.   | DMT |      | Improvement<br>knowledge and c<br>of the examiners |              | Improve the standards of<br>evaluation in during issuing<br>driving license |

# 3.4.2 STRATEGY 2: Supervision of driving schools

| Major Activities   | Lead<br>Agency | Partner<br>Agency 1 | Partner<br>Agency 2 | Output   | Expected outcome                                     |
|--|----------------|---------------------|---------------------|--|--|
| Improve the standards of driving<br>schools under the existing grading<br>system | DMT            | МОТ                 |                     | •  | Improve the quality of driver training and education |
| First aid and update basic vehicle maintenance and other technical               | DMT            | МОН                 |                     | Update of the training<br>curriculum and monitoring<br>of number of training |  |

| aspects to be included in the driver training curriculum                         |        | schools implementing it as per the requirements   |   |
|--|--------|---|---|
| A continued monitoring system of driving schools with the involvement of Police. | Police | Number of driving schools<br>inspected and the reduce<br>the number of those<br>without the required<br>standards | Improve the quality of driver<br>training and education |

# 3.4.3 STRATEGY 3: Satisfactory drivers health condition

| Major Activities   | Lead<br>Agency | Partner<br>Agency 1 | Partner<br>Agency 2 | Output  | Expected outcome                 |
|--|----------------|---------------------|---------------------|---|----------------------------------|
| Legislation to be drafted to improve<br>standards for medical testing of<br>drivers and regularize the testing<br>procedure, including testing after<br>serious accidents.                               | NTMI           |                     |                     | Reduce the number of<br>drivers with health<br>conditions that affect their<br>vehicle operating capacity | Improve driver health conditions |
| Legal provisions to be considered If<br>government or private institutions<br>fail to comply with standards for<br>driver's health, and working hours,<br>they should be made liable for legal<br>action | DMT            | NTMI                |                     | Formulation of the necessary regulation   | Improve driver health conditions |

# 3.4.4 STRATEGY 4: Enactment of required legislation

| Major Activities   | Lead<br>Agency | Partner<br>Agency 1    | Partner<br>Agency 2 | Output  | Expected outcome  |
|--|----------------|------------------------|---------------------|---|---|
| Set & seek compliance with speed<br>limits, drunk driving laws & evidence-<br>based standards & rules for motor<br>cycle helmets, seat belts & child<br>restraints, use of mobile phones                       | Police         | DMT                    |                     | Monitor the road user<br>compliance for these<br>through sample surveys and<br>identify where enforcement<br>is necessary | Reduce the number of accident and the severity                        |
| Strengthen existing laws to include all<br>passengers travelling in the front<br>seats to wear the seatbelts.  |                | Police                 | NCRS                | Increasing no. of passengers<br>wearing seat belts  | Reduce injuries during motor vehicle accidents                        |
| Gazetting of regulations for carrying<br>children below an identified age or<br>height in the front seat of any vehicle<br>to be made an offence. Mandate child<br>restraints according to the age/<br>height. | DMT            | Ministry of<br>justice | Police              | Determining the criteria and<br>formulating the necessary<br>regulation   | Reduce injuries to children<br>involved in motor vehicle<br>accidents |
| Enforcement of laws relating to<br>prosecuting owners of vehicles, who<br>allows person to drive without valid<br>driving license  | DMT            | Police                 | NCRS                | Reducing no. of drivers without a valid license   | Ensure drivers are properly qualified/trained to operate a vehicle    |

| Laws to be enacted on a priority basis<br>to Implement measures to eliminate<br>jay-walking at identified high risk<br>locations |     | Ministry of<br>Justice | Reducing number of people<br>jay-walking in high risk<br>locations |  |
|--|-----|------------------------|--|--|
| New laws to be enacted to implement<br>measures to eliminate hazards<br>caused by road side obstructions and<br>visual clutter   | UDA | Police                 | Number of issues identified<br>and interventions carried<br>out    |  |

# 3.4.5 STRATEGY 5: Effective enforcement of the legislation

| Major Activities  | Lead<br>Agency | Partner<br>Agency 1 | Partner<br>Agency 2 | Output   | Expected outcome   |
|---|----------------|---------------------|---------------------|--|--|
| Implementation of suspension of<br>driving license and move for warrants<br>when offenders evade summons to<br>courts | DMT            | Police              |                     | Number of suspended<br>driving licensers for<br>offenders who have evaded<br>summons | Increase the number of convictions for traffic violators / absconders                    |
| Immediate communication to<br>Commissioner of Motor Traffic all<br>suspensions of driving license by<br>Courts        | DMT            | Police              |                     | Develop procedure to<br>inform DMT and increase<br>number of reported cases          | Improve coordination<br>between law enforcement<br>and driving license issuing<br>agency |
| Introduce an electronic driver<br>absconders' register with access to all<br>Police Divisions                         | DMT            | Police              |                     | Development of a register  | Improve coordination<br>between Police Stations to<br>identify absconders                |

| Organize island wide apprehension operations of absconders.   | Police                 | DMT             |      | The number of absconders apprehended   | Increase the number of convictions for traffic violators / absconders   |
|---|------------------------|-----------------|------|--|---|
| Monitor the daily updating of the Divisional Traffic Minor offences and submit a monthly/quarterly report   | Police                 |                 |      | Number of reports<br>produced to the relevant<br>stakeholders  | Improvemonitoringmechanismandcoordinationbetweenstakeholders            |
| Interaction with local authorities and<br>community-based organizations to<br>clear road obstructions/hazards   | Police                 | RDA<br>PRDA/ LA | NCRS | Number of community<br>based project implemented<br>related to this                                    | Reduce risk of accidents due to roadway issues                          |
| Establishment of 40 Traffic<br>Courts/Tribunals island wide with<br>computers linked network  | Ministry of<br>justice | МОТ             |      | Number of traffic courts<br>established and increase in<br>the number of completed<br>cases per year   | Improve efficiency in the processing of traffic violation cases         |
| Introduce incentive scheme for<br>Traffic Police based on performance/<br>reduction of accidents.   | Police                 |                 |      | Implementation of the incentive scheme and performance criteria  | Improve road safety in the<br>road network under the<br>Police division |
| Train & deploy Traffic Surveillance<br>units to introduce island wide<br>Selected Traffic Enforcement<br>Programs (STEPs) with covering<br>media publicity and educational<br>impacts | МОТ                    | Police          | NCRS | Increase in the number of<br>units deployed.<br>Provision of necessary<br>equipment for Traffic Police | Reduction in number and severity of accidents                           |

|  |     | to carry out the enforcement program   |
|--|-----|--|
| Leverage on technology for improve<br>surveillance and detection of<br>violations. | DMT | During enforcement, fines Improve driver discipling<br>or traffic citations are issued and compliance to traffic<br>with evidence of the rules<br>relevant traffic violation |

# 3.4.6 STRATEGY 6: Improving insurance system

| Major Activities  | Lead Agency                           | Partner<br>Agency 1        | Partner<br>Agency 2 | Output  | Expected outcome          |
|---|---------------------------------------|----------------------------|---------------------|---|---------------------------|
| A system to be introduced (similar<br>to no claim bonus) to decide the<br>premium based on the driving<br>history of the insuree whereby the<br>offending drivers are penalized<br>with higher premium and not the<br>victims | Sri Lanka<br>Insurance<br>Association | All Insurance<br>companies | NCRS                | Establishment of a centralized system with the history of the insuree                   | Improving driver behavior |
| All accidents causing injury to<br>persons or damages to<br>government property should be<br>reported to police as indicated in<br>the MTA by the relevant insurance<br>company and settlement should                         | Insurance<br>companies                | Police                     |                     | Number of the accidents<br>reported to Police Stations<br>by the insurance<br>companies | ' '                       |

|---|-----|------|---|--|---|----------------------|

### 4 CONCLUSION

The proposed action plan outlines the key interventions necessary to improve the road safety in Sri Lanka under the five pillars. The priority of the projects and budget requirement are to be established at the implementing agency level as it is envisaged it would allow a more accurate assessment could be made considering the resource availability, capacity and budget allocation of the organization.

The following recommendations are made as way forward in implementing the proposed action plan,

National Road Safety Council to take the lead role in coordinating between various stakeholder organizations during the implementation of the action plan. NCRS should also play a role in facilitating implementation of specific activities for which other agencies would need assistance (capacity building, technical input, financial support etc.)

Secretary, Ministry of Transport to forward the proposed action plan to the relevant stakeholder organization and the line Ministry to obtain their concurrence to the proposed strategies and activities assigned to them. Furthermore, the budget requirement to be finalized at the implementing agency level highlighting the provisions that can be allocated from existing budget and the additional funds needed. Each stakeholder agency should also appoint a senior official to represent the institution and he or she would be focal point in discussing matters relevant to the organization during the action plan implementation. The idea is that it will ensure continuity of the work assigned to the stakeholder organization.

Discuss with the Ministry of Finance on the availability of funds in the long term and short term so that the activities can be prioritized appropriately to maximize utilization of funds. Identify alternative sources of funding available for the proposed projects.

Develop a monitoring and evaluation program to assess the progress as well as the impact of the proposed schemes. Implement evaluation programs especially necessary for awareness campaigns, training programs etc. to assess whether it has been effective on the target audience of program participants. Typically these programs are readily implemented due to ease of implementation without a scientific evaluation of their effectiveness .Periodic evaluation would help to revise the action plan so that priority is given for more successful projects.

Increase awareness among general public of the serious concerns related to road safety situation in Sri Lanka at present so that the policy makers would give the due priority to road safety improvement of the country.
